Mustafa Kösebay, Drees & Sommer, Stuttgart

Justus Pysall, Pysall Architekten, Berlin

Monika Thomas, Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety

Moderator: Reiner Nagel, German Federal Foundation of Baukultur

Inner-city development in large cities can succeed only through good project development. Integration into the urban structure and quality of the built environment are crucial for the feasibility of such projects. Baukultur can provide the impetus for sustainable property development in small and medium-sized cities as well.

The German Federal Foundation of Baukultur is once again represented at MIPI in Cannes, 14–17 March 2017, at the German Pavilion, the joint stand of the Federal Ministry for Economic Affairs and Energy and the Federal Chamber of Architects for German planning agencies (Riviera Hall R07.G38). The Foundation seeks to foster international dialogue with construction and real estate industries and will discuss the Baukultur Report 2016/17 “City and Village”.

Further Information:
